OCC
OPTICAL CABLE CORPORATION

INDUSTRY SOLUTIONS:
# E N T E R P R I S E
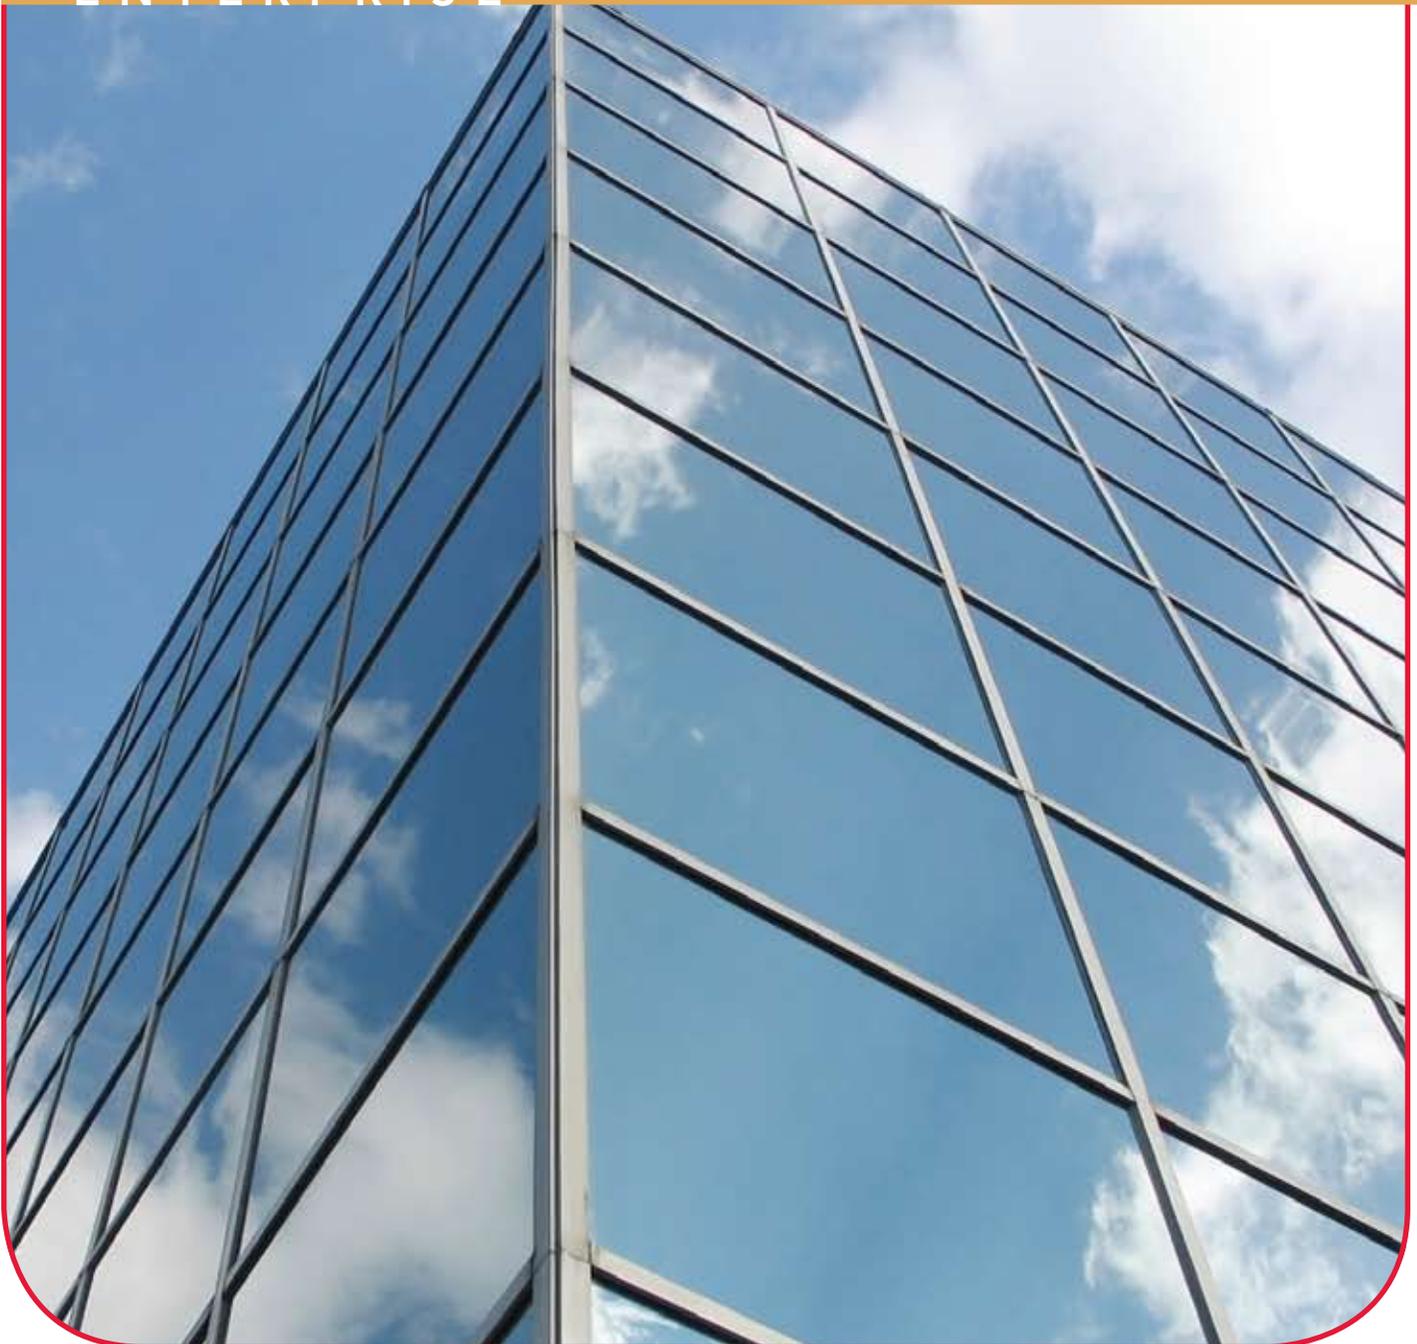

Enterprise Solutions
Bringing everything together

High performance networks have become fundamental to business, manufacturing, transportation, education, media, and security. Optical Cable Corporation provides the right products and services to meet data infrastructure needs, whether the enterprise comprises one building, a campus, or many disparate locations.

Optical Cable Corporation is flexible enough to offer solutions for virtually any industry. Our products are at work in projects as diverse as expansive datacenter applications to airports and office parks.

While the best time to consider the installation of an enterprise solution is during the build phase, OCC offers the expertise to retrofit and upgrade an ailing network in an existing enterprise. Optical Cable Corporation has the ability to help customers select the right products to satisfy today's needs while still anticipating future changes. Through refined engineering and a specification skill set, we are building enterprise solutions that can stay relevant today and in the long run.

With the acquisition of SMP Data Communications, OCC brings a comprehensive customer-centric offering to every installation. One company can now offer turnkey fiber and copper solutions along with a commitment to on-time delivery and product availability.
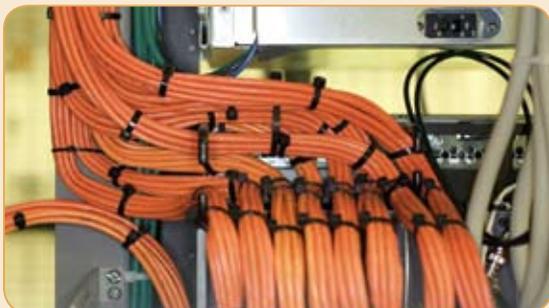

Basic applications

The best company to ask to do an easy job is the one that can handle the most complex ones. For basic cabling solutions and routine applications, OCC offers the most reliable option in the industry. Just because an application is simple doesn't mean it shouldn't be exceptional.

Understanding the requirements of today's business applications is only the beginning. Optical Cable Corporation helps our customers build systems for the future.

Whether a customer is contemplating the latest in fiber optic or copper cabling solutions, Optical Cable Corporation has the expertise to help evaluate specifications, offer suggestions, and provide technical solutions to allow customers to make an educated choice.

OCC built our reputation on creating exceptional backbone and network cabling solutions. We make certain that customers receive the proper products and ancillary materials to complete an end to end installation. Optical Cable Corporation and our subsidiaries strive to become an extension of the customer's data design team to deliver solutions to complement network architecture.

Today's Optical Cable Corporation has moved from being a name synonymous with fiber optics to becoming a total solutions provider through high-performance fiber optic cable, copper and fiber connectivity, and cable management. We offer the products, support and service to realize exceptional performance and to maximize uptime of data centers and local area networks.

Structured Cabling and The Data Center.
It all starts here.

Companies as varied as healthcare administration, mining, broadcast, and education depend on the integrity of data transmission. In fact, the hub that brings data together has become a critical link for success for virtually every industry. OCC can support any structured cabling or data center application regardless of the complexity of the system or the demands of the environment.

Whether the cabling infrastructure is comprised of a single computer servicing one office or a vast network providing communications for a national retail chain, Optical Cable Corporation provides fiber and copper solutions that promote data transmission beyond industry standards.
