Enabling Your Success

Genesis. Wire that Works – the first time, every time. Engineered and tested to exceed the highest quality standards, Genesis low-voltage cable is trusted by contractors worldwide to produce consistent system performance. Our cable delivers a hassle-free experience - from sale to installation - that drives repeat business and gets pros in and out of jobs faster.

Hassle-Free Solutions for Every Application

Our complete portfolio of high-performance solutions span the Security, HVAC and Electrical markets and can be purchased from thousands of locations across the U.S., Canada and Latin America. Optimize system longevity and drive a greater return on investment with Genesis Cable – you can count on it.

SECURITY

- Burglar alarm systems
- Access control
- Closed circuit television (CCTV)

NETWORKING & COMMUNICATION

- Enterprise networks
- Hot spots
- Video conferencing systems
- Point of sale systems

FIRE & LIFE SAFETY

- Conventional, intelligent detection
- Audible and visual notification
- Emergency mass communication

ENTERTAINMENT

- Conferencing and meeting systems
- Home theater audio
- Cable and satellite television

COMFORT (HVAC)

- Building climate and energy management
- Home climate control
- Centralized, localized, and zoned system

OTHER

- LED lighting
- Outdoor lighting
- Underground piping and sprinkler systems

Your Single Source Provider

3-FOR-1 WARRANTY

At Genesis, we ensure protection for you and your customers. If any cable fails to perform to spec, we'll replace it – three units to one.

READYSHIP

Readyship keeps your business running on schedule by providing same-or next-day shipping on more than 70 products.

TOLL-FREE CUSTOMER SUPPORT

We deliver confidence by ensuring prompt response and resolution when and where you need it. When you work with Genesis, you work with the best.

IN STOCK, READILY AVAILABLE

Genesis keeps your business running on schedule, with product availability from thousands of locations nationwide.

Part Numbers, Packaging & Color Codes

All Genesis Cable products are assigned an eight-digit part number that contains a product code, put up code and color code.

Put Up Code	
Code	Description
01	250' Reel
03	4 x 250' Reel
05	250' Pull Box
09	250' SPEED BAG®
10	1000' Reel
11	1000' Pull Box
21	1000' Reel-In-A-Box
25	2500' Reel
39	5 x 50' Coil
43	100' Reel
46	125' SPEED BAG®
48	4 x 500' Reel
50	500' Reel
55	500' Pull Box
58	500' SPEED BAG
61	500' Reel-In-A-Box
71	5000' Reel

Packaging Technology

Genesis Packaging

Created with the installer in mind, our new and improved Genesis Packaging delivers a hassle-free installation experience. Designed to be crush-resistant with reinforced handles, installers benefit from guaranteed durability, smoother installations and the ability to get in and out of jobs faster – increasing total ROI.

Thermostat Cable Reels

Genesis Thermostat Cable Reels are durable, flexible and easy to install for a hassle-free experience you can count on. Its ergonomic features allow for easier transportation and protection from bends, breaks and rust. Additionally, the reel is made from recycled materials for a more environmentally friendly and cost-effective option.

Pull Box Packaging

Simplify cable pulls with Pull Box packaging technology. Operating as a reel-less coil, these boxes prevent tangles and snags to reduce installation time. Stackable and lighter than traditional reels, recyclable Pull Box packaging allows for simple storage and minimized waste.

Speed Bag® Packaging

Save time, space and money with Speed Bag packaging. Easy-to-open, these innovative packages are stackable and facilitate multiple wire pulls from one source. Available for several thermostat and security cables, Speed Bags easily fit into five-gallon buckets, tool bags or carts for ease of transport. They are also environmentally efficient – eliminating empty reels and cutting down on jobsite waste.

SECURITY

Reliability and continuous connectivity are critical for every security network and system performance cannot be trusted to inferior wire. As the foundation for the highest-performing security networks in the world, Genesis Security Cable optimizes intrusion, access control and video systems for continuous high performance at all times.

Hassle-Free Security Solutions

Burglar alarm systems. Access control.
Closed circuit television (CCTV).

Profusion®

Decrease material costs by up to 16% and reduce entry point wiring time by up to 30% with jacketless Profusion Cable. Unconstrained by binders, adhesives or thick overall jackets, this cable is twisted together like a rope, bundling individual lock power, door contact, card reader and request-to-exit wiring.

Access Control Composite Cable

Lessen the risk of snags and more easily bend cable around corners and obstructions. This convenient, jacketed bundle combines individual lock power, door contact, card reader and request-to-exit cables for smoother pulls and more efficient installations.

FIRE & LIFE SAFETY

There is no second chance when it comes to protecting people and their environment, so don't leave system connectivity and performance up to inferior cable. Genesis Fire & Life Safety Cable optimizes critical systems for continuous high performance, delivering peace of mind when it matters most.

Hassle-Free Fire & Life Safety Solutions

Conventional and intelligent detection.
Audible and visual notification.
Emergency mass communication.

Striped Fire Alarm Cable

Maximize jobsite productivity by assigning a different stripe color to each type of circuit for easy differentiation, minimized confusion and expedited installations and service. Extruded stripes offer continuous identification and long-lasting durability.

Stranded Fire Alarm Cable

Experience optimal safety and superior flexibility for easier pulls through conduit, over long distances and around corners.

Metal Clad Fire Alarm Cable

Eliminate the need to bend, install and mark rigid conduit during cable installations. Permanent red helical tape runs continuously along the cable for easy identification as a fire alarm circuit.

COMFORT (HVAC)

Whether implementing smart home technologies or connecting today's most-intelligent buildings, Genesis HVAC & Building Automation Cable optimizes system performance. From simple to complex systems, Genesis maintains its strong market reputation by offering the technology required for continuous high-speed data transfer and system connectivity.

Hassle-Free Comfort (HVAC) Solutions

Building climate and energy management.
Home climate control.
Centralized, localized and zoned system.

Thermostat Cable

Deliver optimal connectivity with Hybrid Thermostat and Standard Thermostat Cables designed for today's high efficiency equipment and equipment from decades past. Available in easy-to-open, environmentally-friendly Speed Bag® packaging and durable reels for hassle-free installations.

Mini Split Cable

Experience complete versatility with cable optimized for in-conduit installations and outdoor installations, with or without conduit. Direct burial and sunlight-resistant listings allow cable to handle harsh and wet environments in unprotected outdoor applications.

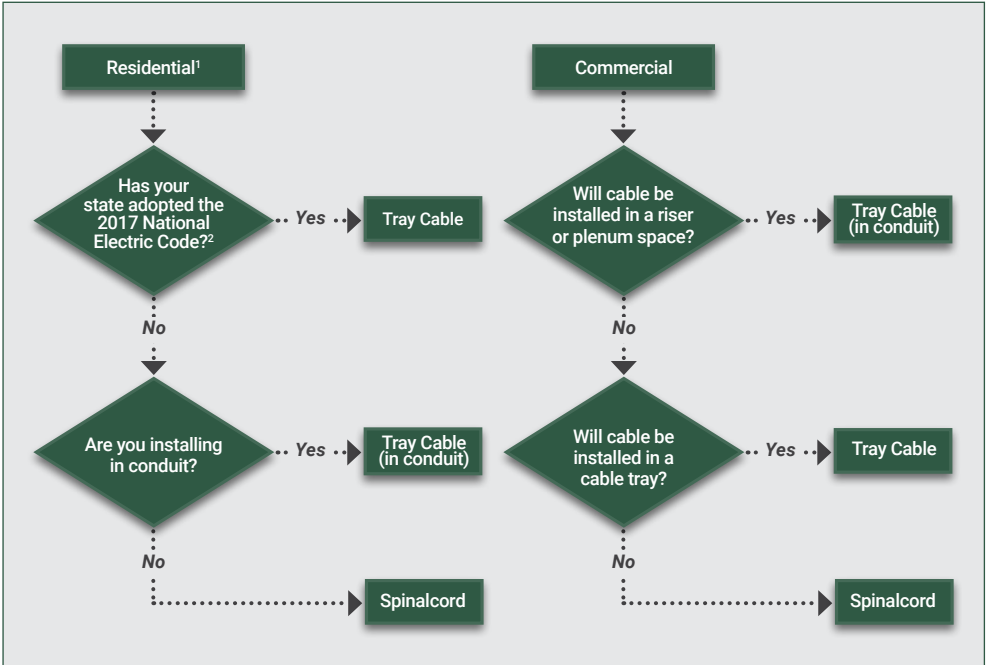

Building Automation Cable

Adhere to several communication standards and protocols that enable communication and data-sharing across devices. Built for integrated building automation systems, these cables protect performance without distortion or interruption, support system functionality, increase building efficiency and maximize energy cost savings.

Choosing a Mini Split Cable

Determine if Genesis Spinalcord® or Genesis Mini Split Tray Cable is best for your next indoor installation.

¹ Defined as a single- or dual-occupancy dwelling.

² NEC Adoption Status: <https://www.nfpa.org/nec/nec-adoption-and-use/nec-adoption-maps>

Under no circumstance will Genesis have any liability for loss or damage incurred as a result of the use of this tool.

When in doubt, consult the appropriate authority having jurisdiction (AHJ).

Reel Applications & Features

Genesis' new Thermostat Cable Reels are made with flexible material that maintains its shape for easy, efficient pulls – from one job to the next. Its ergonomic features allow for easier transportation and protection from bends, breaks and rust. Additionally, the reel is made from recycled materials for a more environmentally friendly and cost-effective option.

Traditional vs. Hybrid Thermostat Cable

Traditional thermostat cable takes a one-size-fits-all approach to cable design. Hybrid Thermostat Cable customizes its design to better fit the needs of modern and legacy thermostat equipment. This upholds device performance at a more cost-effective price.

Powering a Thermostat

A typical thermostat cable contains five to eight conductors. One conductor carries all the current needed to power the thermostat. The remaining conductors split this current to control specific, individual functions, such as cooling, heating and fans.

Traditional Thermostat Cable

Traditional Thermostat Cable is designed with 18 AWG conductors. **Requiring more copper, it is less cost effective and weighs more, making transport more challenging.**

All conductors, except for the power supply, **are larger than they need to be to optimize device performance.**

Hybrid Thermostat Cable

Hybrid Thermostat Cable is designed with an 18 AWG power supply conductor and all remaining conductors at 20 AWG. **The smaller gauge conductors use less copper, creating a more cost-effective solution that is lighter and easier to haul.**

Despite its smaller conductors, **voltage drop is negligible and the cable can perform up to 250 feet.**

Mini Split Control

Tray Cable

AWG	Number of Conductors	Solid / Stranded	Nominal O.D.	Product Number
16	4	Stranded	0.305 in.	1068
14	3	Stranded	0.365 in.	1069
14	4	Stranded	0.390 in.	1070
14	7	Stranded	0.460 in.	1073

In states where the 2017 NEC (or later) has been adopted, cable may be installed in-wall without conduit in one- and two-family dwellings.

NETWORKING & COMMUNICATION

Continuous connectivity and system reliability are critical for every data network - from the home to complex systems. Designed to increase signal speed, Genesis Networking & Communication Cable protects network security and boosts system integrity for optimal performance, for every application.

Hassle-Free Networking & Communication Solutions

Enterprise networks. Hot spots.
Video conferencing systems.
Point of sale systems.

Cat 6A Cable

Provide maximum bandwidth, capacity and speed – and 10G performance – delivering optimal results for today's high-tech applications.

Shielded Network Cable

Protect highly confidential data transmission and minimize interference for a faster, stronger and safer connection.

Direct Burial Cable

Prepare for harsh outdoor conditions with cable expertly engineered to be rugged, durable and sunlight-resistant.

The Importance of Verifications

Setting Industry Standards

Industry standards for category cables are created by the Telecom Industry Association (TIA/EIA). Each category has specific performance requirements that need to be met to be verified for that category. As the category number increases, so do the performance requirements.

Performance requirements are tested up to standard frequencies for each category: **Cat 5e at 100 MHz, Cat 6 at 250 MHz and Cat 6A at 500 MHz**, and all are tested at a length of 100 meters.

Evaluating Performance Claims

Any manufacturer claims of performance beyond these lengths and frequencies should be examined and considered with extreme caution. These claims often require products to be used within specific circumstances and applications that don't offer the versatility of verified category cable.

Cables failing to meet set standards can experience incomplete signal transfer and signal interference, affecting the performance of the entire system. This reduces system flexibility for future business needs, leading to unnecessary rip-outs and installations and additional time and money.

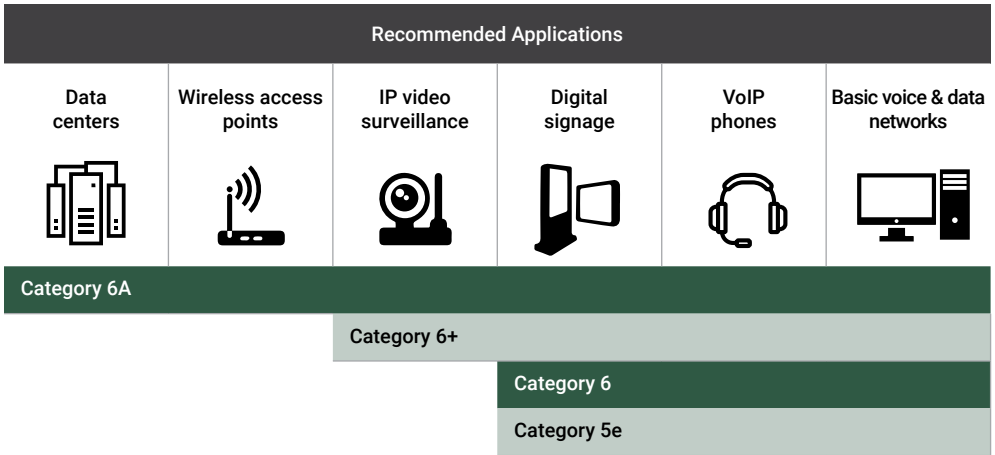

Verified cables can be identified by locating the UL-Verified holographic sticker or ETL-Verified printed mark on the cable's packaging, in addition to reviewing the print legend on cable for UL or ETL text. It must read: ANSI/TIA-568.2-D. Both must include the tested communication standard, i.e., Cat 5e.

Bandwidth and PoE

Power Over Ethernet (PoE) Cable provides both data and electric power to a device, eliminating the need for additional wiring. Most category cable offers PoE functionality, but bandwidth limits – the maximum amount of data that can be transferred along a cable – dictate the most appropriate application for each type of cable.

Cable Type	Bandwidth @ 100 Meters	Bandwidth @ 30 Meters	Recommended PoE Limit
Category 6A	10 Gbps	40 Gbps	60W+
Category 6+	1 Gbps	10 Gbps	60W+
Category 6	1 Gbps	10 Gbps	60W+
Category 5e	1 Gbps	1 Gbps	Up to 25.5W

OTHER

Genesis Lighting and Tracer Cables are outdoor rated for continuous connectivity, no matter the environment. Offering a selection of sizes and capabilities, Genesis Cable is the wire to count on for outdoor comfort and safety.

Hassle-Free Cable Solutions

LED lighting. Outdoor lighting.
Underground piping & sprinkler systems.

LED Lighting & Dimming

Increase efficiency and control over lighting systems with cables designed for indoor and outdoor applications. Offering more system customization, LED Lighting & Dimming systems have a longer lifespan and increased energy efficiency, for optimized, long-term performance.

Landscape Lighting

Protect system performance using cable approved with direct burial and sunlight resistant ratings. These cables are perfect for low-voltage direct burial lighting applications.

Tracer/Irrigation

Identify pipes and cables more easily in buried applications with specific color codes. With a direct burial rating, cable can withstand harsh weather conditions to perform when it is needed most.

Tracer wire is typically color coded as follows:

- Yellow - Gas Pipes
- Blue - Water Pipes
- Orange - Fiber Optic Cables
- Green - Sewage Lines

TECHNICAL TOOLS & RESOURCES

The following resources are designed to support the cable selection and installation process. Use them as an ongoing reference to ensure you choose the right cable for your next installation.

Cable Listings

All Genesis Cables are UL- or ETL-listed. Cable listing marks show that products have been tested to industry-specific fire and safety standards by unbiased third-party organizations. Choosing listed cable will protect your cable investment - preventing rip outs, reinstallations and fire hazards.

Reputable Testing Partners

The two most recognized testing entities are UL and ETL. Both are certified as Nationally Recognized Testing Laboratories (NRTL), giving them the authority to test and certify products to widely accepted safety requirements.

Though different organizations, UL and ETL test to the same standards for any given listing and a listing from either organization has identical meaning.

 <p>Underwriters Laboratories (UL) is a global entity that tests and certifies products and helps develop industry standards through ongoing scientific research.</p>	 <p>Intertek (ETL) is a globally recognized testing entity that tests and certifies products to published industry standards.</p>
---	---

Manufacturers have the freedom to choose their NRTL, including a testing entity besides UL or ETL.

The Mark of Quality

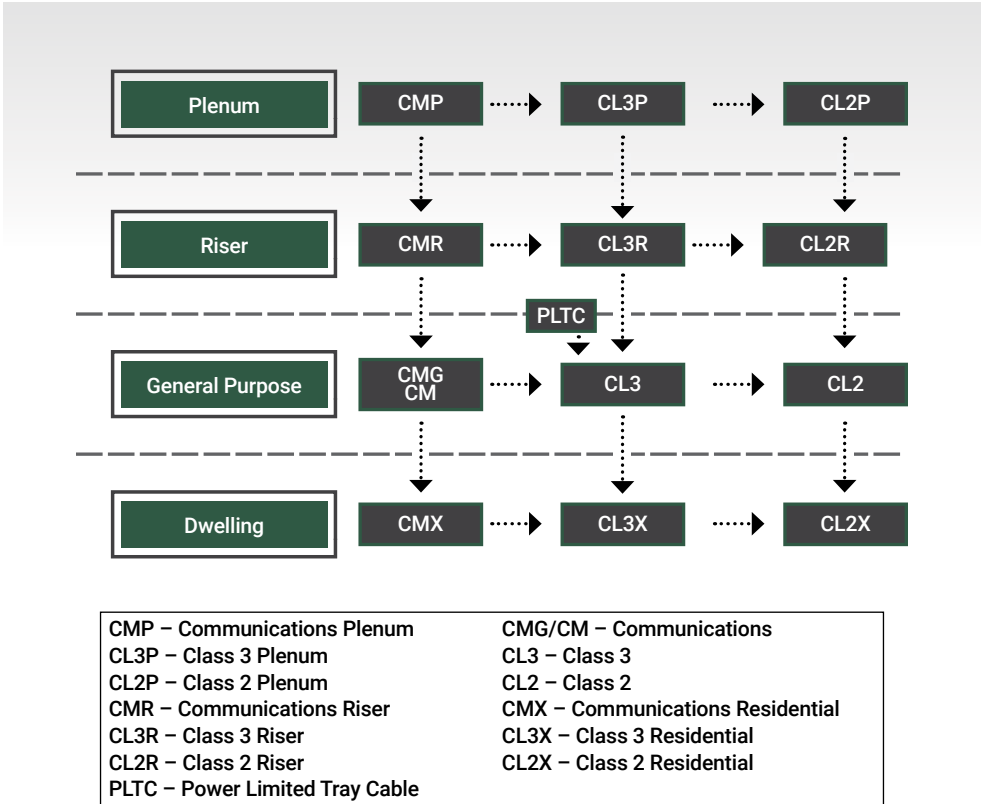

Listed cables can be identified by the listing mark and unique file number placed on the product and its packaging. This mark is most often found on the front of boxes, circular flange or label of reels, and the file number is printed on the cable's jacket.

Unmarked products shouldn't be trusted and are a threat to device and personal safety.

	
<p>ETL printed mark</p>	<p>UL holographic sticker</p>

National Electric Code

Substitution Hierarchy for Class 2 and Class 3 Cables

The wiring requirements of Article 725, Parts I and III, apply where substitute cable is installed.

Conductor Sizing

The American Wire Gauge System (AWG) standardizes conductor sizing and all Genesis Cables follow this system. As the gauge number decreases, conductor size increases. This lowers resistance, increases the amount of power that can be safely transferred by the conductor and extends the length of runs. Choosing cable with the correct gauge is essential for system performance.

DC Resistance (at 20 °C)					
AWG	Conductor Comparison	Solid Conductor		Stranded Conductor	
		Ohms per 1000 feet	Ohms per kilometer	Ohms per 1000 feet	Ohms per kilometer
24		28.6	93.8	26.47	87.6
23		22.3	73.2	21.1	69.2
22		18	59.1	16.9	55.4
20		11.1	36.4	10.5	34.4
18		6.52	21.4	6.66	21.9
16		4.1	13.5	4.19	13.7
14		2.57	8.45	2.62	8.60
12		1.62	5.31	1.65	5.41
10		1.02	3.34	1.04	3.41
8		0.6407	2.102	0.6535	2.144

Outdoor Ratings

When installing cable outdoors, both performance and safety depend on the selection of the right cable for the job. This reference guide differentiates the types of outdoor cable ratings Genesis offers, empowering you to make the best choice for your next installation.

Rating/Feature	Cable Marking	Applications	Testing & Additional Information
Sunlight Resistant	<p>Sunlight Resistant, Sun Res or SR</p> 	<p>May be installed in locations exposed to sunlight.</p>	<p>Informally known as UV Rated cable.</p> <p>Evaluated for long-term (720 hours) exposure to UV light and light moisture.</p>
CMX-Outdoor	<p>CMX-Outdoor</p> 	<p>Suitable for installations outdoors on a 1- or 2-family dwelling.</p> <p>Not suitable for burial applications.</p>	<p>Evaluated for long-term (300 hours) exposure to UV light and light moisture.</p>
Wet Location	<p>Wet or Wet Location</p> 	<p>Often combined with other features like sunlight resistance and water blocking for expanded installation versatility.</p>	<p>Insulated conductors evaluated for long-term exposure to water.</p>
Direct Burial	<p>Direct Burial, Dir Burial or Dir Bur</p> 	<p>Suitable for burial with or without conduit.</p> <p>Often combined with other features like sunlight resistance and water blocking for expanded installation versatility.</p>	<p>Evaluated for water absorption and crush resistance.</p>
Water Blocked	<p>Noted in Cable Specification</p> 	<p>Install for added protection of sensitive connected equipment and devices.</p>	<p>Prevents the flow of water along length of cable in unlikely event of compromised cable jacket.</p> <p>Achieved through various methods including gels, tapes, and powders.</p>
